

CONTAINER WAGON

Railbound container transport wagons in different versions as

- Flatbed bogies for longitudinal or transverse container loading
- Low bed bogies with lowered support between the axles
- Turntable bogies for manual swiveling (4 x 90°)
- Tandem or triple bogies for higher automation (only with electric drive)

Support frame with teardrop plate cover, in hot-dip galvanized steel design, screwed corner guides, wheels, axles, bearings painted, shoe parking brake, for standard skip containers up to 12m³, drive load capacity up to 175 kN.

- with attachable hand ratchet for manual displacement
- with electric drive for motorized displacement with limit switching on both sides and power supply with
 - spring-actuated cable reel
 - hanging trailing cable
 - power tracks with lateral unwinding

Rails, wheel flange angle for recessed installation, track crossing with turntable

Heavy-duty container wagon for rail-less use in two versions as flat-bed or deep-bed bogies

Suitable for carrying capacities up to 120 kN with teardrop plate cover, with pivoted bogie steering and coupling fork, twin tires and parking brake, hot-dip galvanized steel design and various special designs are also possible.

Heavy duty trailer

Container wagon with load cells
